Objective

 I am a highly motivated tech-enthusiast, with a passion for front-end and full-stack development. I have a strong foundation in HTML, CSS, JavaScript, and I am continuously enhancing my skills in React.js and Node.js. I am eager to gain hands-on experience in web development and contribute to innovative projects that help me grow as a developer. I am open to opportunities such as internships, freelance projects, or entry-level roles that allow me to apply my knowledge while learning from industry professionals.

Education

Bachelor of Commerce
C.S.J.M University , Kanpur |2021-24

Skills

• **Front-End Development:** HTML5, CSS3, JavaScript,React
• **Back-End Development:** Node.js, Express.js
• **Tools & Frameworks:** Bootstrap , TailwindCSS, Framer-Motion and more..
• **Database Management**: Basic understanding (e.g., MongoDB, MySQL)
• **Version Control:** Git, GitHub

Projects

Lottery Game – Frontend React Project

An interactive lottery game with engaging animations, sound effects, and a fully responsive UI. Built using **React**, **CSS**, and **Framer Motion** for smooth transitions.

Yapper | MERN Chat App

A real-time chat app built with the MERN stack featuring authentication, group chats, typing indicators, and message notifications. Integrated **Socket.IO** for real-time messaging and **Cloudinary** for image uploads.

Simon Say's Game

A modern remake of the classic Simon Says memory game with smooth animations and mobile-friendly design. Features dynamic color sequences and responsive gameplay**.**

Weather Application

A real-time weather app with single-screen layout and animated UI components. Features include dropdown history, weather icons, and data fetched from **OpenWeatherMap API**.
